# NEWLY ENDORSED POCKET SPRING RANGE

Available in 3 comfort levels  
Gentle, Medium and Firm

## Support System

This particular range has a 5 zoned pocket spring system which has alternating comfort and support zones. The support zones are located either side of your hips. This results in a 'cradling' effect which will assist to align your spine.

Another feature of the pocket springs within this bed is that each will respond individually to body pressure or movement. What that means to you is that when you or your partner move throughout the night, the individual pocket springs act, cradle and contour to the body at every turn, so that partner disturbance is greatly minimised.

## Foam Boxed Edge

Each bed has a high density boxed foam edge which encases the spring system the entire way around. This creates two very important benefits for you. One is that the useable sleep surface of the bed is increased, which gives you superior comfort all the way to the edge of the bed. The 2nd benefit is that 'roll out of bed' feeling which you can experience, is reduced significantly.'

## Aloe Vera Infused Fabric

This fabric is made in Australia and has been infused with the natural gel from an Aloe Vera plant. The fabric will protect, soothe and care for your skin.
